PROFESSIONAL SUMMARY

SEO Specialist and WordPress web developer with 3+ years of hands-on experience in technical SEO, on-page SEO, local SEO and AI Search Optimization (AIO, AEO, GEO). A background in computer programming and hardware servicing shapes how I work: site architecture, crawlability and indexability come first, followed by keyword research, content strategy, internal linking and schema markup. Since 2023 I have done SEO for dental practices, real estate teams, business brokers, restaurants, e-commerce stores and an iGaming brand in the US, Canada and South Korea. Results include growing a dental client from 224 to 1,705 average monthly organic visits and getting client pages cited in Google AI Overviews and ChatGPT answers. I work in WordPress, Lofty, Kajabi and Duda and report through Google Search Console, Google Analytics 4 and Ahrefs. I also offer GoHighLevel funnel building, AI automation, social media management, email marketing, Google Ads and Meta Ads as supporting services, backed by formal ads training and a 2026 GoHighLevel workshop.
